

foreverbeech™

PREFINISHED HARDWOOD CLADDING

New Zealand's finest sustainably harvested hardwood cladding, to enrich your home for generations. Another exciting addition to our health based building category, this truly unique hardwood cladding delivers significant performance benefits. Structural performance, stability, breathability, superior wear resistance, high impact resistance are but some of the benefits. Foreverbeech provides architects, designers, manufacturers and specifiers with options previously unattainable when compared to soft wood cladding options. Foreverbeech hardwood cladding is positioned to answer the call as a locally produced hardwood cladding that ticks all the boxes.

foreverbeech advanced specifications:

- MPI certified forest management
- Precision band sawn face profile
- Spectacular decorative appearance
- Certified structural quality performance
- High impact resistance
- High stability
- Precision kiln dried to 12%
- Exclusive Natural House Company oil coatings
- Precision pre-priming
- H3.1 durability without chemical treatment

foreverbeech decorative appearance:

Enhance Foreverbeech with Natural House Company decorative surface appearances.

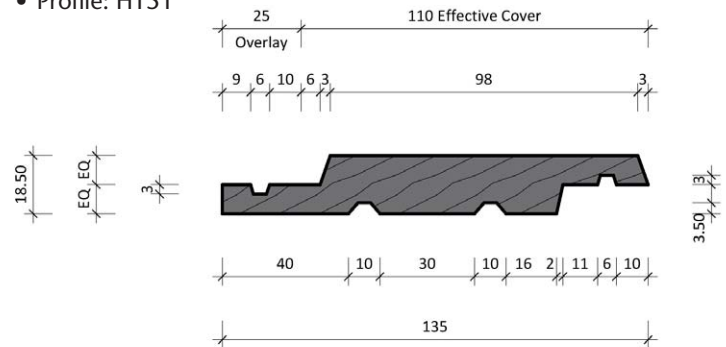

While every care has been taken to obtain an accurate representation, due to monitor and print variations, actual colours may differ.

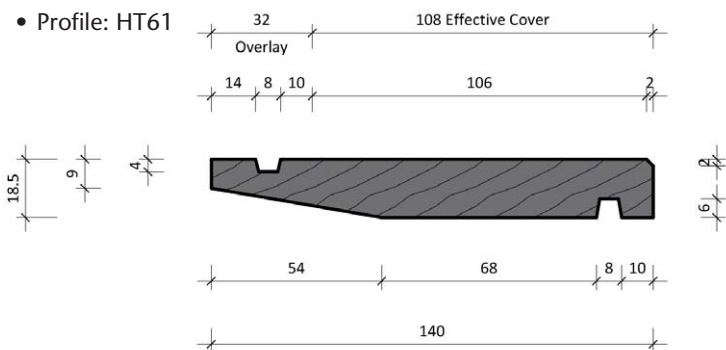

foreverbeech product specifications:

- Precision profiled with band sawn face
- Available in certified structural finger jointed lengths, up to 6.3m

• Profile: HT51

• Profile: HT61

foreverbeech storage and handling:

- As the product is kiln dried, care must be taken to make sure the product remains dry at all times while in storage and during delivery
- Foreverbeech weatherboards must be stored on a well ventilated level surface, on bearers at least 150mm off the ground, protected from direct sunlight and moisture prior to installation

foreverbeech installation:

It is important to install timber weatherboards according to the New Zealand Standard NZS 3604:1999. We also suggest reading the BRANZ publication "Good Timber Cladding Practice" as a guide to installation practices. Refer to NZS3602, NZS3604, NZS3605, NZS3640 and NZS4203
